

SGS 2010 Clinical Meeting oral poster presentation:

A retrospective multicenter study on outcomes after midurethral polypropylene sling (MUS) revision for voiding dysfunction

Principal investigator: Stephanie Molden

* SGS President's Award for Outstanding Research in Gynecologic Surgery

Risks factors leading to post sling voiding dysfunction and sling revision - A multicenter case-control study

Principal investigator: Stephanie Molden

IRB variability in multicenter studies

Principal investigator: Heidi Harvie

SGS 2009 Clinical Meeting oral poster presentation:

Anatomical outcomes of abdominal sacrocolpopexy and vaginal mesh procedure (Prolift, Gynacare) for Pelvic Organ Prolapse: Fellows'Pelvic Research Network.

Principal investigator: Tatiana Sanses

Anatomical and operative outcomes of uterosacral ligament suspension versus vaginal mesh procedure (Prolift Gynacare) for Pelvic Organ Prolapse: Fellows'Pelvic Research Network.

Principal investigator: Tatiana Sanses

SGS 2009 Clinical Meeting poster presentation:

Sexual function is related to body image perception and prolapse symptoms but not to vaginal topography

Principal investigator: Lior Loweistein

Sexual function and activity among women with Pelvic Floor Disorders (PFDs)

Principal investigator: Tola Omotosho

AUGS 2009 Clinical Meeting accepted for oral poster presentation:

Sexual activity and Function in women with and without PFDs.

Principal investigator: Tola Omotosho

Abdominal sacrocolpopexy and uterosacral ligament suspension for pelvic organ prolapse: Does a choice of suture material at the vaginal cuff affect anatomic outcomes.

Principal investigator: Danielle Patterson
